CONETIC
SOFTWARE SYSTEMS, INC.

Linux ThinClient
Quick Installation Notes
July 20, 2008

Server Install --

Start by logging on to the console – from a graphical desktop running "gnome or kde".

Step 1 – Login as "root"

Step 2 – Create users for "cbase" and "cbooks". Make sure to also create a group "conetic". Assign cbase and cbooks to the primary group "conetic".

Step 3 – Copy the installation "CD" programs to your hard drive. Once copied change the file permissions by executing
```
      # chmod gou+rwx ./*bin    <cr>
```

Note: If downloaded install file from the internet – you will need to untar the file. Using --
```
       # tar -xvf ./filename    <cr>
```

Step 4 – Install the server - Prior to running the install routine, you will need to verify that you have java installed on this machine. To verify java – 1) open browser; 2) goto the link below – to test and verify java.

Java Test Site - http://java.com/en/download/installed.jsp?detect=jre&try=1

Most linux systems use the ice tea java runtime. It is recommended that you use the OS software installation tools to add java support.

If java is installed – install programs by typing: # ./serverfile.bin   <cr>

Step 5 – reboot the server

That's it … your demo data and desktop icons for the "cbase and cbooks" users are ready to go!!!!

Step 6 – Install the Windows Thinclient -

Note: Accessing the system from a command prompt requires that you:

```
$ cd /home/conetic56     <cr>
```

Then set your environment by typing:

```
$ . ./sp    <cr>
```

Standard/Default passwords:

Thinclient -

    login: cbooks
    password: cbooks1

Thinclient Administrator -

    login: administrator
    password: conetic

Visual Grace Edit -

    login: cbooks
    password: cbooks1
